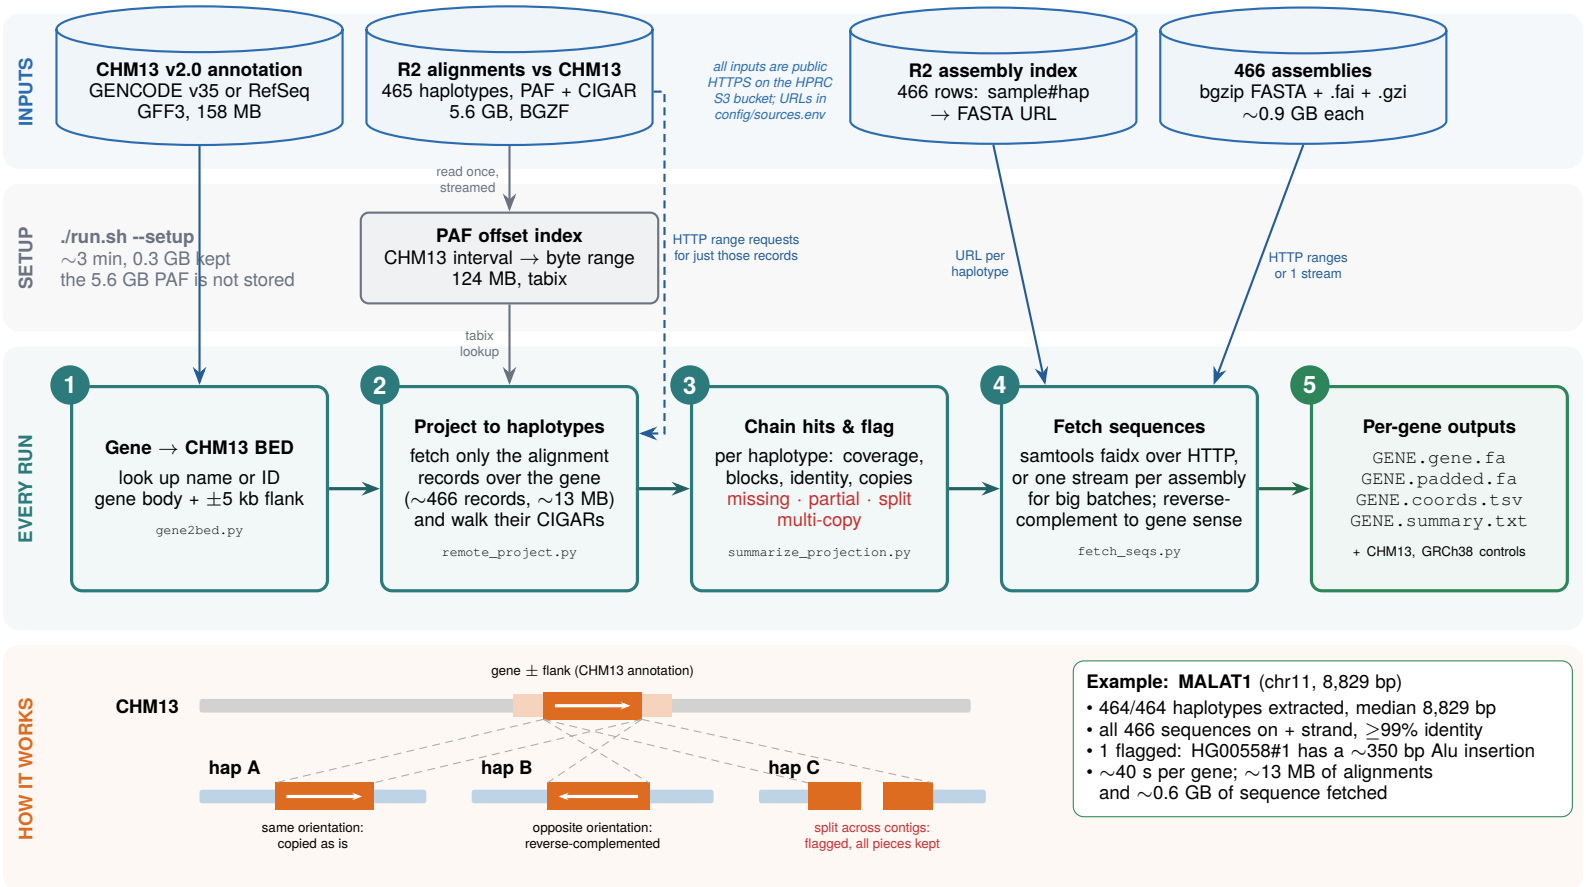
genefinder

a CHM13 gene → its sequence in all 464 HPRC Release 2 haplotypes, without downloading assemblies



Example: MALAT1 (chr11, 8,829 bp)

- 464/464 haplotypes extracted, median 8,829 bp
- all 466 sequences on + strand, ≥99% identity
- 1 flagged: HG00558#1 has a ~350 bp Alu insertion
- ~40 s per gene; ~13 MB of alignments and ~0.6 GB of sequence fetched
